Homework Review: Pg. 115 # 7 to 18

1.
Convert to a decimal by long
division, then convert the decimal to
a per cent. $\Rightarrow \frac{5}{8}$
(per hundred)

$$\frac{5}{8} \Rightarrow 8 \overline{) 0.625}$$

5	.	0	0	0
4	8			
2	8			
1	6			
4	0			

$$\therefore \frac{5}{8} = 0.625 = 62.5\%$$
