Solve by completing the square:

$$\textcircled{1} \quad \frac{3x^2}{3} - \frac{5x}{3} + \frac{1}{3} = \frac{0}{3}$$

$$x^2 - \frac{5}{3}x + \text{cloud} = -\frac{1}{3} + \text{cloud}$$

$$x^2 - \frac{5}{3}x + \left\{\frac{25}{36}\right\} = -\frac{12}{36} + \left\{\frac{25}{36}\right\} = \frac{13}{36}$$

$$\swarrow \quad \searrow$$
$$\left(x - \frac{5}{6}\right)^2 = \frac{13}{36}$$

$$x - \frac{5}{6} = \pm \sqrt{\frac{13}{36}} = \pm \frac{\sqrt{13}}{\sqrt{36}} = \pm \frac{\sqrt{13}}{6}$$

$$x = \frac{5}{6} \pm \frac{\sqrt{13}}{6} = \boxed{\frac{5 \pm \sqrt{13}}{6} = x}$$

$$\text{ck} \quad 3\left(\frac{5+\sqrt{13}}{6}\right)^2 - 5\left(\frac{5+\sqrt{13}}{6}\right) + 1 \stackrel{?}{=} 0$$

$$3\left[\frac{25+10\sqrt{13}+13}{36}\right] - \left[\frac{25+5\sqrt{13}}{6}\right] + 1 \stackrel{?}{=} 0$$

$$\frac{38+10\sqrt{13}}{12} - \left[\frac{25+5\sqrt{13}}{6}\right] + 1 \stackrel{?}{=} 0$$

$$\frac{19+5\sqrt{13}}{6} - \left[\frac{25+5\sqrt{13}}{6}\right] + 1 \stackrel{?}{=} 0$$

It would be nice to be able to tell if you could factor a quadratic (so you could solve it by factoring/ZPP). Otherwise you must Complete The Square.

There is a tool that tells you important facts about the quadratic. It is called the discriminant.

(DON'T MIX THIS UP WITH THE DETERMINANT OF A MATRIX).

$$d = b^2 - 4ac = \underline{\text{discriminant}}$$

$d = \text{Perfect Square} \Rightarrow$ The solutions to the quadratic are RATIONAL and it can be factored

$d = \text{Perfect Square} = 0 \Rightarrow$ S/A BUT IT HAS A "double root", ie, it is a Perfect Square Trinomial

Ex. # 32 of homework:

$$x^2 - 8x + 15$$

$$a = 1 \quad b^2 - 4ac$$

$$b = -8 \quad (-8)^2 - 4(1)(15)$$

$$c = 15 \quad 64 - 60 = \boxed{4 = d} \quad \text{Perfect Square}$$

• RATIONAL ROOTS
• FACTORABLE

Ex. Try the Perfect Square Trinomial you created in # 32 by Completing The Square

$$x^2 - 8x + 16$$

$$a = 1 \quad b^2 - 4ac$$

$$b = -8 \quad (-8)^2 - 4(1)(16)$$

$$c = 16 \quad 64 - 64 = \boxed{0 = d} \quad \text{Perfect Square}$$

• RATIONAL
double roots

• Factorable, Perfect Square
Trinomial
